Additional Instructions

Off-line Switch

To take the Sprint off-line
(dis-enable) set the toggle
switch up. This will enable
the user to LOAD or SAVE
programs to a standard audio
cassette recorder in the
usual manner. It will also
allow the use of Interface 1
and microdrive commands. When
use of the Sprint for loading
or saving is required, set
the toggle switch down. The
switch should not be used
during a LOAD or SAVE as the
computer will crash.
